

## Entry-Level Asset Management For Small Firms

Asset management specialist Assetware Technology has launched a new entry-level product designed and priced for the smaller business.

Assetware Express is ideal for businesses that currently manage assets using spreadsheets, which, although easy to set up, may contain undetected errors and tend to have poor audit trails and version control.

Assetware Express provides a flexible, affordable and easy-to-use solution for the smaller business. It is easily integrated with financial accounting systems and has advanced reporting facilities, including the ability to define user 'views' of the data. Disposal of assets is fully supported, and

Express maintains a full audit history of all assets. A free 30-day trial can be downloaded from [www.assetware-technology.com](http://www.assetware-technology.com)
